Internship Task 5 - To-Do List Web App

1. What the Project Does

This project is a simple and responsive To-Do List Web Application built using HTML, CSS, and JavaScript. It allows users to:

- Add new tasks with a description, due date, and priority level.

- Edit existing tasks.

- Delete tasks that are no longer needed.

It provides a clean and user-friendly interface to manage daily tasks efficiently.

2. How to Run or Test It

To run the To-Do List Web App, follow these simple steps:

1. Copy the full code into a new file and save it as 'index.html'.

2. Double-click the file or right-click and open it with any web browser (e.g., Chrome, Firefox).

3. You will see the To-Do List interface. Add tasks, assign due dates and priorities, edit or delete them as needed.

3. Dependencies or Instructions

- No external dependencies or libraries are required.

- This project uses only basic HTML, CSS, and JavaScript.

- It works entirely offline and does not require a server or database.

- Suitable for beginners in front-end development or internships.
